

# MARIANO JR QUITONG DAGA-ANG

## DATA ANALYST | STATISTICAL ANALYST

Dipolog City, Zamboanga del Norte | 0948-453-3934 | mqdagaang@gmail.com

LinkedIn: [linkedin.com/in/mariano-q-daga-ang-jr-566185286/](https://www.linkedin.com/in/mariano-q-daga-ang-jr-566185286/)

### PROFESSIONAL SUMMARY

Data and statistical analyst experienced in economic and administrative data preparation, validation, analysis, and reporting at the Philippine Statistics Authority (PSA). Supports Provincial Product Accounts (PPA) and provincial GDP compilation; turns datasets into statistical tables, reports, dashboards, infographics, and stakeholder presentations.

### TECHNICAL SKILLS

Analytics: Data cleaning, validation, transformation, EDA, trend analysis, economic statistics

Excel: Pivot Tables, XLOOKUP | SQL: JOINS, GROUP BY, aggregations (developing)

Power BI / Tableau (developing) | Python (basic) | MySQL / PostgreSQL (learning)

Other: PSIC industry classification, reporting, C/C++, embedded C, AUTOSAR, Git

### PROFESSIONAL EXPERIENCE

#### Statistical Analyst (COSW) | Philippine Statistics Authority, Zamboanga del Norte

Jan 2024 - Present | Provincial Product Accounts (PPA)

- Collect, process, validate, and transform LGU and establishment administrative data.
- Classify establishments using the Philippine Standard Industrial Classification (PSIC).
- Compute industry-level revenue and value-added estimates; support provincial GDP compilation aligned with the Philippine System of National Accounts (PSNA).
- Analyze sector growth and contributions; prepare tables, reports, dashboards, infographics, social cards, and presentations for stakeholders and policymakers.
- Conduct quality checks to improve data accuracy, consistency, and reporting reliability.

#### Software Development Engineer | FPT Software Philippines Inc.

Nov 2022 - Jun 2023 | Global Automotive and Manufacturing Philippines project

- Developed and tested embedded C software following AUTOSAR requirements.
- Applied MISRA-C and BARR-C standards; configured AUTOSAR modules using EB tresos.
- Worked with microcontrollers, CAN, I2C, and UART; contributed to code reviews and technical documentation using Git-based version control.

### SELECTED DATA PROJECTS

#### Provincial GDP Dashboard (PPA Analysis)

Planned dashboard of provincial GDP by sector, growth trends, contributions, and indicators.

#### Business Survey Data Analysis (QSPBI Simulation)

Analyzed sample business survey metrics, computed growth rates, and prepared an Excel dashboard.

#### SQL-Based Business Data Analysis (In Progress)

Practicing SQL JOINS, GROUP BY, and aggregations to examine revenue, expenses, and industry data.

### EDUCATION

#### Bachelor of Science in Computer Engineering

Jose Rizal Memorial State University - Main Campus | Graduated SY 2021-2022

Senior High School: Dipolog Medical Center College Foundation Inc.; High School: Alberto Q.

Ubay Memorial Agro-Tech Science High School; Elementary: Olingan South Elementary School.
